About ChartIQ

ChartIQ builds powerful, lightweight financial solutions that modernize the user experience for capital market institutions, investment banks, and brokerage firms around the world. Harnessing the power of HTML5, ChartIQ specializes in building advanced time-series financial charts, technical analysis tools, and data agnostic trading platforms.

Utilizing powerful APIs, simple SDKs, and an accelerated path to integration, developers can build complex projects quickly and deploy across web, mobile, and desktop with ease. With ChartIQ, customers deliver the most advanced user experience on any device.
